

**Notice of Commencement of an Environmental Screening Review
and Public Open House
Northern Lights Wind Park Project
Municipality of Grey Highlands, County of Grey
Installation of up to 10 Wind Turbines**

Energy Farming Ontario Inc. (EFO) is proposing to construct up to 10 wind turbines for up to 20.0MW on agricultural lands it has leased in the County of Grey. As a requirement prior to construction, the project is subject to the Ministry of the Environment's Environmental Screening Process for Electricity projects over 2.0 megawatts (MW). The project will be located on leased lands within the study area shown in the map.

The Environmental Screening Report ("ESR") will be prepared under Ontario Regulation 116/01 of the Environmental Assessment Act. The ESR is being completed as required for a Category B project under the Ministry of the Environment's Environmental Screening Process for electricity projects as outlined in their "Guide to Environmental Assessment Requirements for Electricity Projects (March 2001)".

Where applicable, the project will also have regard for federal requirements. The proponent will work with the appropriate federal agencies to ensure the project meets the requirements for a screening level study under the Canadian Environmental Assessment Act.

Come to the Open House

Energy Farming Ontario Inc. encourages members of the public to participate in the environmental screening review process by attending Open House or contacting us directly with comments or questions and to be added to the project mailing list. Information on the project can also be found at the following web site: www.energyfarmingontario.com

The public is welcome and encouraged to attend an Open House to discuss the proposed project and the ESR process. The details of the Open House are as follows:

Date: Thursday, August 6th, 2009
Location: Annesley United Church, 82 Toronto Street South, Markdale, ON
Time: 6:00pm to 8:00pm
